

### REMARKS

The above-identified patent application has been reviewed in light of the Examiner's Action dated December 20, 2004. Applicant notes that the Office Action addresses Claims 1-89 as set forth in the original application. However, a Preliminary Amendment, filed with the application, made various revisions to the application, including the cancellation of the claims in the original application and the addition of new claims. Accordingly, Applicant respectfully requests that the Examiner address the claims that were entered by the Preliminary Amendment.

Applicant further notes that the Preliminary Amendment requested that Claims 1-86 be canceled, and that new Claims 87-123 be entered. However, the application originally contained Claims 1-89. Accordingly, the amendments set forth above further revise the application to cancel Claims 87 and 89, and renumber the new Claims 87-123 submitted in the Preliminary Amendment as Claims 90-126.

The Examiner is invited to contact the undersigned by telephone if doing so would expedite the resolution of this case.

Respectfully submitted,

SHERIDAN ROSS P.C.
